Projects

Wealth Radar

- **Personalized Financial Insights:** Wealth Radar analyzes your income, expenses, and investments to provide tailored insights. It categorizes transactions, tracks spending patterns, and forecasts savings and investment opportunities to help users achieve financial goals effectively.
- **Real-Time Tracking and Alerts:** The platform offers real-time updates on account balances, transactions, and portfolio performance. It also includes customizable alerts for bill due dates, low balances, or unusual transactions, ensuring financial stability and security.

Pet Care App

- **Comprehensive Services for Pet Owners :** Pet Care provides essential services like health consultations, product recommendations, location-based vet shop searches, and specialized care to ensure the well-being of pets.
- **User-Friendly Digital Solutions:** Through its app and platform, Pet Care offers seamless navigation with features like one-on-one consultation, online product purchases, and the ability to locate nearby pet care services, all designed for convenience and reliability.

Fitness Management System

- The Fitness Management System analyzes users' workout activities, health data, and fitness goals to provide personalized fitness insights. It tracks exercise routines, monitors progress, and recommends workout plans based on user performance and goals. This helps users maintain consistency and improve their overall fitness effectively.
- The platform provides real-time tracking of workout sessions, calorie burn, and progress statistics. It also includes customizable notifications for workout reminders, scheduled training sessions, and fitness milestones. These features help users stay motivated and maintain a disciplined fitness routine.

Positions of Responsibility

GDG On Campus | Core Member

Sept'25 - Present

- Collaborate with the Google Developer Groups (GDG) on Campus team to organize developer workshops, hackathons, and tech sessions, promoting hands-on learning in modern technologies.
- Contribute to event planning, outreach, and technical coordination, enhancing peer participation and engagement within the university's developer ecosystem.

Professional Experience

Junior Intern

- Toshali infotech, Surat-Bhattar
- 11/2025-Present
- Built and improved web pages using React.js. Fixed frontend errors and bugs during development. Learned practical React development through real project work.
